

CSP50-K

COAXIAL SURGE PROTECTION DEVICE

CSP50-K protects equipment from high voltage surges such as lightning strikes. UL grounding requirement for coaxial cable offer protection from hazardous voltages that may occur on the shielding because of the physical length of ground wires. The system appears as an open circuit to transient high voltage surges and prevents these from passing into domestic electronic equipment such as TVs, VCRs and CATV converters.

SPECIFICATION

ITEM	CSP50-K
Surge Protection Attack	100 ns
Maximum Surge Current	5000 A
Surge Life	300 surges of 100 A
Normal Resistance Across Coax	10.000 M ohm
Surge Resistance	Approx 0 ohm
Power Passing Capability	DC 90V, AC 90 Vp-p, 65 Vrms at 10 Amp
Insertion Loss	Less than 0.2 dB
Return Loss (75°)	16 dB
Connector	BNC male to BNC female
Dimension (mm)	73.8(D) x 25.4(H) x 25.4(W)
Weight (gr)	80
